

EXPERIMENT : 11

Aim : Write a program to display using user input.

Source code :

```
#include<iostream>

using namespace std;

int main() {

    string roll_no, cont_no;

    char name[25],address[25],course[25];

    cout<<"STUDENT DETAILS"<<endl;

    cout<<"Enter the roll no: ";

    cin>>roll_no;

    cout<<"Enter the contact: ";

    cin>>cont_no;

    cout<<"Enter the name: ";

    cin>>name;

    cout<<"Enter the address: ";

    cin>>address;

    cout<<"Enter the course: ";

    cin>>course;

    cout<<"THE DETAILS OF THE STUDENT"<<endl;

    cout<<"Roll no:"<<roll_no<<endl;

    cout<<"Contact no:"<<cont_no<<endl;

    cout<<"Enter the name:"<<name<<endl;

    cout<<"Enter the address:"<<address<<endl;

    cout<<"Enter the course:"<<course<<endl;

    return 0;

}
```

Output :

```
C:\Users\HP\OneDrive\Docun  X + v
STUDENT DETAILS
Enter the roll no: 24100BTBDCEIM17526
Enter the contact: 9630577080
Enter the name: GOURAV.SHARMA
Enter the address: INDORE
Enter the course: CSE
[ DETAILS OF THE STUDENT
roll no:24100BTBDCEIM17526
contact no:9630577080
Enter the name:GOURAV.SHARMA
Enter the address:INDORE
Enter the course:CSE

-----
Process exited after 30.22 seconds with return value 0
Press any key to continue . . .
```

EXPERIMENT : 12

Aim : Write a program to display using user input with class and object.

Source code:

```
#include<iostream>

using namespace std;

class student{

public:string roll_no,cont_no;

char name[25],add[25],course[25];

public:void input()

{

    cout<<"THE DETAILS OF STUDENT"<<endl;

    cout<<"Enter the roll no: ";

    cin>>roll_no;

    cout<<"Enter the contact: ";

    cin>>cont_no;

    cout<<"Enter the name: ";

    cin>>name;

    cout<<"Enter the address: ";

    cin>>add;

    cout<<"Enter the course: ";

    cin>>course;

}

void output(){

    cout<<"THE DETAILS OF THE STUDENT"<<endl;

    cout<<"Roll no:"<<roll_no<<endl;

    cout<<"Contact no:"<<cont_no<<endl;

    cout<<"Enter the name:"<<name<<endl;

    cout<<"Enter the address:"<<add<<endl;

    cout<<"Enter the course:"<<course<<endl;

    });
```

```
int main(){  
  
    student obj;  
  
    obj.input();  
  
    obj.output();  
  
    return 0;  
  
}
```

Output :

```
C:\Users\HP\OneDrive\Docum  X  +  v  
STUDENT DETAILS  
Enter the roll no: 24100BTBDCEIM17526  
Enter the contact: 9630577080  
Enter the name: GOURAV.SHARMA  
Enter the address: INDORE  
Enter the course: CSE  
THE DETAILS OF THE STUDENT  
Roll no:24100BTBDCEIM17526  
Contact no:9630577080  
Enter the name:GOURAV.SHARMA  
Enter the address:INDORE  
Enter the course:CSE  
  
-----  
Process exited after 30.22 seconds with return value 0  
Press any key to continue . . .
```

EXPERIMENT : 13

Aim : Write a program to calculate sum of n natural number.

Source Code :

```
#include<iostream>

using namespace std;

int main()
{
    int num,i,sum=0;

    cout<<"Enter any natural: ";

    cin>>num;

    if(num<=1) {
        cout<<"Enter valid no: ";
    }

    else for(i=1;i<=num;i++) {
        sum=sum+i;
    }

    cout<<"The sum of natural no: "<<sum<<endl;

    return 0;
}
```

Output :

```
C:\Users\HP\OneDrive\Docun  ×  +  ▾
Enter any natural: 50
The sum of natural no: 1275

-----
Process exited after 4.027 seconds with return value 0
Press any key to continue . . .
```

EXPERIMENT : 14

Aim : Write a program to calculate sum of n natural number using class and object.

Source code:

```
#include<iostream>

using namespace std;

class A{

public : int num,i,s=0;

public : void input(){

    cout<<"Enter any natural: ";

    cin>>num;

}

void sum(){

    if(num<=1) {

        cout<<"Enter valid no: ";

    }

    else for(i=1;i<=num;i++) {

        s=s+i;

    }

    cout<<"The sum of natural no: "<<s<<endl;

}

};

int main(){

    A obj;

    obj.input();

    obj.sum();

}
```

Output :

```
C:\Users\HP\OneDrive\Docun  ×  +  v

Enter any natural: 50
The sum of natural no: 1275

-----
Process exited after 4.027 seconds with return value 0
Press any key to continue . . .
```
